Attempt/Reattempt Date Schedule

Scheduled Institution Payments

Institution payments can be processed every business day of the month. Each institution will elect the processing days for their regularly scheduled institution payments. Each payment processing day is mapped to a specific reattempt date. The reattempt date does not have to be a processing day elected by the institution.

| Attempt Date Reattempt Reattempt 1st 16th 1st 2nd 17th 2nd 3rd 18th 3rd 4th 19th 4th 5th 20th 5th 6th 21st 6th 7th 22nd 7th 8th 23rd 8th 9th 24th 9th 10th 25th 10th 11th 26th 11th 12th 27th 12th 13th 28th 13th 14th 28th 14th 15th 1st 15th 16th 1st 16th 17th 2nd 17th 18th 3rd 18th 19th 4th 19th 20th 5th 20th |

| Last Day of Month 15th Last Day of Month |

If the effective date for a scheduled payment is delayed due to a weekend or banking holiday the system will retain the scheduled date when determining the date of the reattempt. Example: The regularly scheduled institution payment is the fourth of the month. 9/4 falls on a Saturday and due to the Labor Day holiday, the 9/4 payment is not attempted until 9/7. If this payment returns it will follow the reattempt schedule for payments on the fourth of the month. The payment would be scheduled to reattempt on the 9/19.

If a scheduled institution payment is manually changed to occur on another day of the month, the reattempt will follow the reattempt schedule for the date the payment was manually changed to.

Example: The regularly scheduled institution payment is on the seventh of the month. The institution allows the 11/7 payment to be manually moved to 11/18. The 18th becomes the new scheduled payment date. If the payment on 11/18 returns, the payment will be reattempted on the 12/3.

If a first reattempt of a payment is manually changed, the 2nd reattempt date would be based on the reattempt cycle for the new first reattempt date.

Example: The scheduled institution payment is on the sixth of the month. The 3/6 payment returns and is automatically scheduled to reattempt on 3/21. The institution allows the reattempt scheduled for 3/21 to be manually moved to 3/27. The 3/27 payment returns and will be automatically scheduled to reattempt on 4/12 rather than 4/6.

Online Payments for Automated Payments

Online payments do not automatically reattempt. If an online payment is returned, the system will restore the payment schedule to the pre-online payment schedule.

Example: An online payment of \$100 is made on 4/12. The payer elects to have the \$100 payment applied to the next scheduled payment. The next scheduled payment is on 4/20 and is in the amount \$500. The online payment is returned on 9/14. The \$100 credit applied to the 4/20 payment is removed and the payment amount is restored to \$500.

If the online payment is returned after the scheduled payment it was applied to has already been attempted, the balance difference will be moved to an unresolved status.

Example: An online payment of \$100 is made on 3/10. The payer elects to have the \$50 applied to the 3/12 and 4/12 payments. The payments on 3/12 and 4/12 are in the amount of \$500. After applying the \$50 to each payment, the payments will now be \$450 each. On 3/12, \$450 is attempted. The \$100 online payment returns on 3/13. The 4/12 payment

will be restored to \$500. The \$50 from the 3/12 payment will be moved to an unresolved status since the 3/12 payment has already been attempted.

Automated Returned Payment Fees

Automated Returned Payment Fees will be attempted the first business day that is at least five calendar business days following the return that triggered the fee. This count begins one calendar day following the return.

Example: The scheduled institution payment is on the third of the month. The 5/3 payment returns due to non-sufficient funds on 5/5. The returned payment fee will attempt on 5/10. If 5/10 is a holiday or weekend, it will attempt on the next business day.

Returned Payment Fees will be attempted for online payments.

Returned Payment Fees will be not be reattempted if they return.

Automated Institution Late Fees

An institution can elect to collect an automated late fee through FACTS. The institution can elect to have a late fee charged the first, second or third time a payment returns. Institution late fees will be added onto the next regularly scheduled payment that is at least 10 calendar days in the future and that has never been attempted.

Example: The institution has elected to have a late fee charged when a payment returns for the third time. The regularly scheduled payment date is the sixth of the month. The 10/6 payment returns. It is attempted for the second time on 10/21. The 10/21 payment is returned. The payment is attempted for the third time on 11/6 along with the regularly scheduled 11/6 payment. Both of the payments on 11/6 return. The 10/6 payment moves to an unresolved status and a late fee is added to the regularly scheduled 12/6 payment. The 11/6 payment will follow the standard reattempt cycle.
